INTERNSHIP

Web Developer, TMM India	May' 25 – Aug' 25
- Engineered the company's official website end-to-end using React.js, Node.js, and Supabase, collaborating directly with stakeholders to translate requirements into a live product - Refactored backend database schemas and API query logic, decreasing average response times from 1.2s to 0.7s and boosting overall site load speed by 40% - Streamlined deployment via CI/CD pipelines for zero-downtime rollouts, while assembling reusable modular React components that cut estimated future dev time by 30%	
Tech: React, Tailwind, Typescript, Supabase, Vercel	

PROJECTS

InsideInvest – AI Investment Research Agent Github Link	May' 26 – Jun' 26
- Architected a full-stack agentic research app with a 6-node LangGraph.js state graph handling ticker resolution, financials, web search, fundamentals, sentiment, and synthesis, orchestrated via an Express.js backend to auto-generate "Invest/Pass" recommendations with confidence and risk scores - Established real-time progress streaming using Server-Sent Events, paired with a zero-cost DuckDuckGo scraper (Cheerio) to eliminate paid search API dependency - Crafted a custom HTML5 Canvas price-chart and SQLite-backed caching layer, enabling instant report reloads on repeat queries	
Tech: React, Express.js, LangGraph.js, Gemini API, Node.js, SQLite, yahoo-finance2, Cheerio	

Blogfolio – Full-Stack Blogging Platform Github Link	Dec' 25 – Jan' 26
- Developed a full-stack blogging platform with Appwrite handling authentication, database, and file storage as a complete content-management backend - Integrated a TinyMCE rich-text editor for post creation alongside Redux Toolkit for centralized state management and React Hook Form for validated user inputs - Assembled a responsive component library using shadcn/ui, Radix UI, and Tailwind CSS v4, with React Router powering seamless client-side navigation	
Tech: React, Redux Toolkit, Appwrite, TinyMCE, React Hook Form, Tailwind CSS, shadcn/ui	

TRAINING

Data Structures and Algorithm in Java - Cipher School	Jun' 25 – Jul' 25
- Completed an intensive 70-hour structured program centered on problem-solving, algorithmic thinking, and optimizing solutions using Java - Covered core concepts spanning arrays, strings, linked lists, stacks, queues, trees, graphs, recursion, backtracking, greedy algorithms, and dynamic programming - Sharpened competitive programming techniques through weekly assessments and project-based exercises, writing efficient, scalable solutions aligned with FAANG-style DSA interview patterns
